

SEEBURGER B-to-Bi Paper Industry Solution

Do not only connect your internal systems, connect your company with your partners.

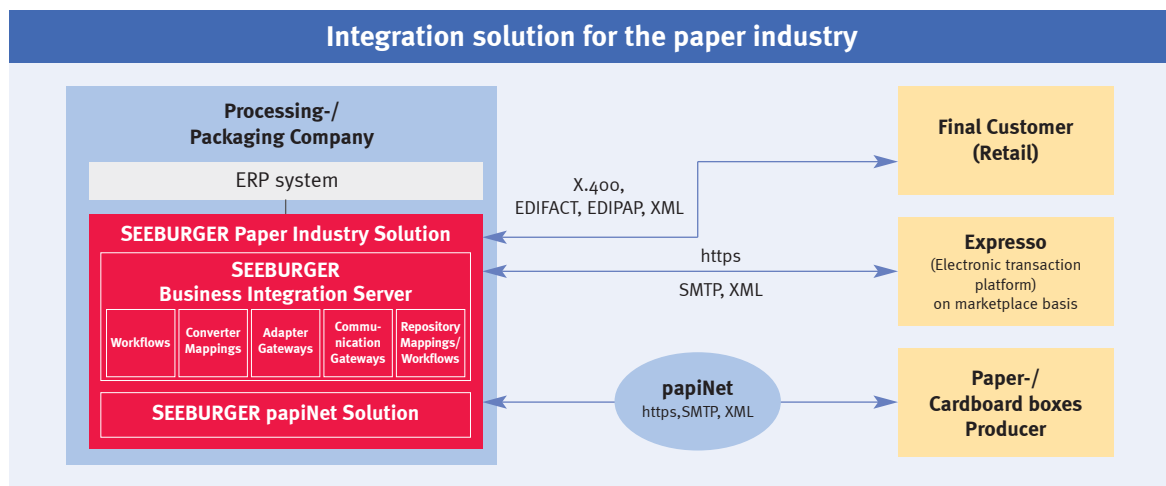

»Change your Business into an eBusiness.«

■ Challenge of the industry

- Constantly increasing cost pressure
- Need to avoid delivery bottlenecks
- Globalisation of competition
- Need to trace processes
- Stronger dependence on suppliers
- High load of production capacities
- Order processing in real-time

■ Future of the industry

- Vertical melting of business processes along the value chain across company frontiers.
- SEEBURGER can support you hereby with the integration of business processes, to gain a real competitive edge.

■ Advantages with the SEEBURGER Paper Industry Solution

- Integration of existing, so far isolated processes (legacy systems)
- Fully automated integration of the internal IT environment
- Secured ERP coupling (SAP, Baan, ...)
- Connection of different databases via JDBC/ODBC
- High security level through integration of relevant encryption tools
- Support of Classic EDI (EANCOM, EDIPAP, X.400) for the retail sector
- Immediate use through the SEEBURGER papiNet Solution
- Immediate migration to ebXML (papiNet 2.0) is possible through technology head start
- Data transparency through message-tracking
- 16 years of industry experience, over 5.800 satisfied customers

Integration Solution for the Paper Industry

Automation of business processes through the SEEBURGER Paper Industry Solution

■ Support of papiNet standards

up to version 2.0

- Purchase Order
- Order Confirmation
- Weight List
- Delivery Message
- Call-off
- Invoice

■ Functions of the SEEBURGER papiNet solution

- Reliable transfer in XML format via https
- Encryption and electronic signature of business documents
- Validation of XML documents
- Compression on less than 10% of the original size
- Archiving
- Visualisation and administration of messages
- Java-based, platform-independent solution

Various pre-defined business processes decrease the investment costs and shorten the introduction of eBusiness scenarios, which are adopted especially to the paper industry by the integration of the papiNet standard. The components can be composed individually according to company size and requirements.
